- December 10, 2024

### W.J. Cornell Icehouse 1910

This icehouse was on the lake between Lighthouse Point and Wahmeda.

### Consumption Fun Facts

**Water:**

Think about replacing with ENERGY STAR appliances. An Energy Star certified washer uses 13 gallons of water per load, while a standard washer uses an average of 23 gallons. That adds to more than 3000 gallons of water wasted per year! Plus you can claim a rebate here at the Village Office!

**Electric:**

Properly insulating your house can save you over \$400 a year, plus helping you to stay cool in the summer and warm in the winter.

## **APPLIANCE ADVANTAGE REBATE**

The Village of Mayville and the Independent Energy Efficiency Program (IEEP) are sponsoring the appliance advantage rebate program to encourage residential electric customers to upgrade their appliances to ENERGY STAR certified appliances. A copy of the rebate can be found at [villageofmayville.com](http://villageofmayville.com) or picked up at the Village Clerk's Office. The equipment must be purchased new, installed at your Village of Mayville resident and the rebate must be requested within six months of the receipt purchase date.
